PROCEEDINGS

(under section 56(1) (e) of the Maharashtra Value Added Tax Act, 2002)

No.DDQ-11/2013/Adm-6/23/Remand-2016/B-1

Mumbai, dt.22 · 03 · 2017

A determination order No.DDQ-11/2013/Adm-6/23/B-4 Mumbai, dt.20.10.2014 was passed in the case of the applicant, M/s. The Brihan Maharashtra Sugar Syndicate Ltd. determining as follows:

"The questions posed for determination are answered thus:

- The Business Transfer Agreement and the Transfer of Licenses Agreement present a transaction for transfer of business. Though the transaction represents a transfer of business, the split-up of the consideration as available 1. from the Agreements would render the transaction to the extent of the consideration received on account of the movable assets to be a 'sale' of goods for the purposes of the Maharashtra Value Added Tax Act, 2002.
- As per the facts as disclosed by the applicant, the sale price for the transaction would be Rs. 42.12 crs. The 2. amount of Rs. 42.12 crs. is amenable to tax as per the following Table -

value	Schedule Entry	Rate of Tax
	E-J	12.5%
	*	1
	C-39	5%
	A-27	Nil%
	value 11,65,00,000 25,00,000 10,00,000 20,00,000 10,00,00,000 16,80,00,000	11,65,00,000 E-1 25,00,000 10,00,000 20,00,000 10,00,00,000 C-39

Sulphar Molasses	36,95,035.50	D-4	20%

An appeal against the determination order was preferred before the Hon. Maharashtra Sales Tax Tribunal (Hon. MSTT) by the applicant. The same was decided through order dt.09.03.2016 in VAT Appeal No.1153 of 2014 whereby the aforesaid determination order was set aside to record findings regarding items included in Schedule '2' which pertains to 'plant and machinery". The observations of the Hon. MSTT could be reproduced thus -

"14. We have carefully gone through entire record. The value of plant and machinery, which is shown by the appellant in the agreement is 11.65 crores. According to the appellant, it is part of immovable property. According to revenue, it is movable property, and therefore, "goods". In the Business Transfer Agreement dated 16/12/2010, on page-3, description of assets is given in following terms:

"Assets" shall mean all property, assets, benefits and rights of the Seller relating to the Business, (a) benefit of the Permits as set out at Schedule "1", (b) the plant and machinery as set out at Schedule "2", (c) the, furniture and fixtures, vehicles and equipment as set out at Schedule "3", (d) the intangibles including the Intellectual Property described at Schedule "4"; the benefit of all contracts relating to the Business listed at Schedule "5"; (f) Inventory such as raw and packing materials, finished goods, stock in process, imported concentrates; molasses Rectified Spirits, Extra Neutral Alcohol, Malt Spirit, Grape Spirit, Cane Juice Spirit, Maize Spirit as set out at Schedule "6" ("Inventory");;"

e:\desktophackup_15.11.16\kadam lm12\ddq\brihans-remand.doex

Careful perusal of the entire record goes to show that Schedule-2 is not forming part of the record.

15. The word "goods" is defined by Section 2(12) of MVAT Act in the following terms:

"goods" means every kind of movable property not being newspapers, actionable claims, money, stocks, shares, securities or lottery tickets and includes live stocks, growing crop, grass and trees and plants including the produce thereof including property in such goods attached to or forming part of the land which are agreed to be severed before sale or under the contract of sale;

16. We fail to understand in the absence of Schedule-2, and without recording any findings what was the intention of the parties regarding items included in Schedule '2'; how the learned Commissioner of Sales Tax was able to decide the determination application filed by the appellant. We are of the firm opinion that without examining Schedule '2' as described in the agreement, it is not possible to decide whether the order of determination passed by the learned Sales Tax Commissioner is correct or otherwise. There is no proprietary in examining other arguments advanced by the parties before us. In this view of the matter, we pass the following order :

ORDER

VAT Appeal No. 1153 of 2014 is partly allowed. The Determination Order passed by the learned Commissioner of Sales Tax dated 20/10/2014 is quashed and set aside. Matter is remanded to the learned Commissioner of Sales Tax, for recording findings in the light of observations recorded above."

The present proceedings, therefore, are in pursuance of the aforesaid order of the Hon. MSTT.

- A hearing in the matter was scheduled on dt.16.11.2016. Sh. P. C. Joshi (Advocate) attended 02. the hearing. The proceedings during hearing are thus -
- He submitted that

The proceedings have been remanded only for examining Schedule 2 for arriving at the rate of tax decided earlier on plant & machinery.

All movables incidental to the transfer of business would not be taxed in absence of any agreement separately for such movables for sale thereof.

- A copy of Schedule-2 is given.
- His attention was invited to the decision regarding immovable / movable property of the Hon. Supreme Court in Commissioner of Central Excise, Ahmedabad v. Solid and Correct Engineering Works [(2010) 5 SCC 122]. In response thereof, it was submitted that a written submission would be given in the matter. Sales TayAgordingly, submission dt.22.11.2016 was furnished on dt.23.11.2016. The same is reproduced thus:

"At the time of hearing of the above determination application on 16th November, 2016 my attention was drawn to the Supreme Court Judgment in the case of Commissioner of Central Excise, Ahmedabad Vs. Solid and Correct Engg. Works (2010) 5 SCC 122.

2. I have perused the said judgment and my comments are submitted herein. Before I do so I may bring your kind notice that the photographs submitted on record depict the complete overview of the plant and machineries involved in the distillery business that were transferred to M/s. Brima Sagar Maharashtra Distilleries Ltd. After considering the pictorial scenario you would appreciate that the land, building and the entire existing plant in running condition Annivawas agreed to be transferred to the said company.

3. None of the part of the plant so transferred was ever fitted with nuts and bolt only for the purpose of avoiding vibration especially because the entire distillery business involve several integrated simultaneous activities and processes at different level all throughout the factory in question. The entire plant which was erected several years back right from 1982-83 continued uninterruptedly by manufacturing liquor that was sold by the applicant during all those years. The installation and erection completed in the past was in such a manner that none of the part thereof can be severed or removed separately without damaging it because each of such part of the plant had become the part of the land which was also transferred alongwith the liquor business as per the agreement placed on record.

4. It was in that scenario I had argued before the tribunal that the plant and machinery that was transferred was not movable property but immovable one and therefore was outside the scope of MVAT Act. It may also be recalled that the consideration of Rs. 39 crores included the entire property except the lond, for which under the Registration Act a separate conveyance was prepared for the value of Rs. 11 crores. The total consideration agreed between the parties was Rs.50 crores for the transfer of entire liquor business and there was no separate agreement or consideration for sale of individual items described in the said agreement.

5. In view of the above peculiar facts when considered with the photographs on record it would be crystal clear that the judgment in the case of Solid and Correct Engg Works is not applicable to the present case.

6. My comments thereon is as under:

Very first para of the judgment referred to the fact that the controversy in appeal before the Supreme Court was on

the factual backdrop of the case.

7. The precise controversy under determination before the Supreme Court have been mentioned in Para 8 as under: "8. We have heard Mr. P.P. Malhotra, learned Additional Solicitor General for the appellants and Mr. S.K. Bagaria, learned senior counsel for the respondents at length. Two questions in our opinion arise for our determination: (1) Whether setting up of an Ashphalt Drum Mix Plant by using duty paid components tantamount to manufacture of excisable goods within the meaning of section 2(d) of the Central Excise Act, 1944 and (2) whether the respondents engaged in the manufacture of parts and components used for setting up of Ashphalt Drum / Hot Mix Plant were entitled to the benefit of Notification No.1/93 - CE, dated 28th February, 1993 issued under sub-section (1) of Section 5A of the Central Excise Act, 1944 as amended from time to time?

8. In Para 13 of the judgment, the assessee submitted that the plants having been permanently embedded in earth

ceased to be excisable goods.

9. After considering the meaning of movable and immovable property; in para 18 the court observed that the plant in question was not immovable property per se especially because the attachment to the earth through foundation

was not permanent and was easily detachable from the foundation. 10. In para 20 the basic principle which is also applicable to the present case have been stated to the effect that if the attachment of the plant to the foundation was meant for permanent beneficial enjoyment of either the foundation or the land in which the same was embedded, it would be treated as immovable property. The observations from the court of appeal under English Law was advantageously reproduced in which it was emphasized that the degree and nature of annexation was an important element and if the attached chattel cannot be removed without great

damage to the land, the intention would be that annexure was intended to be the permanent part of the land. 11. In para 23, the Hon'ble Supreme Court observed that the plant before it was attached to the foundation by nuts and bolt and therefore cannot be termed as immovable property. In para 24 again the apex court summarised the test to be applied and the reason thereof. None of the test and reasons mentioned therein was applicable to the present case in as much as the entire distillery plant was transferred on as is where is basis as running concern. The photographs also indicate the entire plant and buildings in which the machinery grouted were so installed / erected for the permanent enjoyment of the land in question.

12. The plant and machinery in the present case were never intended to be dismantled nor could such running condition plants be sold in the market and therefore the entire plant and machinery transferred as a part of one consideration of Rs.39 crores was part and parcel of the basic intention of the parties to the agreement to transfer the business as a whole including the land on which the plants and buildings were constructed or erected. The consideration for land was also a part of total consideration of Rs. 50 Crores but had to be evaluated separately

for the purpose of registration of the documents.

13. I may repeat that the entire plant including the various parts thereof were erected in such a manner that the same became permanent structure embedded to the earth. The entire plant of manufacturing liquor consisted of various sections spread over the large portion of land with a specific and earmarked function in the integrated

activity of manufacturing liquor.

14. The judgment in the case of Solid and Correct Engg Works, pronounced on its own peculiar facts before it, will have no application to the facts that prevailed in the present case admittedly involving the transfer of business as arunning concern. In order to have better appreciation I annex hereto a note prepared by the applicant describing in detail the manner in which each section of the unit were fixed on the RCC Foundation meant for permanent use of the entire plant as one unit for manufacture of liquor involving various stages right from storage of molasses, its fermination through several tanks and yeast vessels fixed at the distillery house. After the fermentation and distillation the material travel through boiler, oil tank, water tank and bio gas plant. From the bio gas plant power was generated that used for running of other machines.

15. As explained in the note, the entire installation and erection was undertaken with the prior permission from various Govt., authorities mentioned therein. It is worthwhile to note that the plant, machineries and tanks once became the part of the whole plant as per rules and regulations and directions by Govt., authority, they cannot be

moved much less removed.

16. In view of the above submissions especially in absence of any separate agreement for the sale of other movable capital assets none of them be determined to be falling within the tax net of MVAT Act and not liable to any tax on the back ground of section 44(4) of that Act.

Note on Plant & Machinery

Distillery - Molasses storage tanks, fermentation house comprising of pre-fermenters, Fermentation Tanks, Yeast vessels, weighing scales and other intermediate tanks & other accessories are fixed & grouted on RCC foundation.

Also Distillation House comprising Wash Column, Rectifying column, Exhaust columns of Rectified spirit plant & extra Neutral alcohol plant, Spirit storage tanks are fixed on RCC foundation.

Pot-still Distillation Unit comprising of Fermentation Tanks, with accessories, Pot-stills Mash ton with process vessels are grouted on RCC foundation.

Boiler house comprising of boiler, oil tank, water tank, filters with accessories are fixed on RCC foundation.

Bio-gas plant comprising of bio-digesters, with gas blowers, & other accessories are fixed on RCC foundation. H2s scrubber comprising of Reaction tank, scrubber, gas holder with other accessories are grouted on RCC

foundation/structure. Power generation unit comprising of gas engine, with accessories installed on proper RCC foundation.

Prior to installation & erection of plant & machineries the proper permissions from various Govt. authorities liker Jt. Director, of Industrial safety & health, commissioner of state excise, Maharashtra Pollution control board have been obtained and plant operation is started. Hence all machineries and tanks are set up.

The orientation of plant machineries and tanks cannot be changed once they are fixed while erecting the

plant as per rules & regulations as directed by Govt. authorities. Civil foundation (RCC) of the plants & machineries are firm & fixed as per drawings & design which are approved by various Govt. bodies and can not be moved. If they are moved from their position or dislocated, they cannot be utilized for process & are to be scrapped after dismantling."

03. OBSERVATIONS

Sales Tax

I have reproduced hereinabove the directions with which the determination order No.DDQ-11/2013/Adm-6/23/B-4 dt.20.10.2014 was passed in the case of the applicant, M/s. The Brihan Maharashtra Sugar Syndicate Ltd. (TBMSSL). In terms thereof, I have to record my findings with regard to Schedule 2. Before I move on to record the same, let me reproduce hereinagain, the order of the earlier Commissioner:

"The questions posed for determination are answered thus:

1. The Business Transfer Agreement and the Transfer of Licenses Agreement present a transaction for transfer of business. Though the transaction represents a transfer of business, the split-up of the consideration as available from the Agreements would render the transaction to the extent of the consideration received on account of the movable assets to be a 'sale' of goods for the purposes of the Maharashtra Value Added Tax Act, 2002.

As per the facts as disclosed by the applicant, the sale price for the transaction would be Rs. 42.12 crs. The

amount of Rs. 42.12 crs. is amenable to tax as per the following Table -

Particulars	value	Schedule Entry	Rate of Tax	
Plant & Machinery	11,65,00,000	E-1	12.5%	
Furniture & fittings	25,00,000			
Equipments	10,00,000			
Vehicles	20,00,000			
Goodwill	10,00,00,000	C-39	5%	
Manufacturing Licenses	16.80,00,000	A-27	Nil%	

Particulars	Particulars value		
ENA	1,12,70,562.18	D-4	Rate of Tax 20%
Rectified spirit - 9 Years old	25,89,550.00		
ENA	21,19,669.89		· Sur I
Malt Spirit (67 OP.) - 2 years old	97,64,235.07		
Peated Malt spirit 8 years old	10,70,870.14		
High Bouquet malt spirit 4 years old	4,98,184.23		
Grape Spirit (67 OP.)	1,06,221.92		
Cane Juice Spirit (67 OP.) - 2 years old	10,318.22		
Sulphar	80,000.00	E-1	12.5%
Molasses	36.95.035.50	D-4	20%

I have to categorically observe herein that the aforesaid determination order is being remanded to record findings only in respect of the value of the plant & machinery of Rs.11.65 crores which is disputed on the ground that the same being immovable wouldn't attract any tax. The tax liability as respects the other items of the two Tables in the Determination Order has not been found fault with. In view thereof, I proceed thus -

In the determination order which has been remanded, it has been observed that -

 The Business Transfer Agreement (BTA) dt.16.12.2010 is for a consideration of Rs.39 crs. The break-up of this consideration was available in Annexure C thereof, as being for the following:

Plant & Machinery	Rs. 11,65,00,000/-
Furniture & fittings	Rs. 25,00,000/-
Equipments	Rs. 10,00,000/-
Vehicles	Rs. 20,00,000/-
Goodwill	Rs. 10,00,00,000/-
Manufacturing Licenses	Rs. 16.80,00,000/-
Total	Rs. 39,00,00,000/-

- The Land and Building is sold for a consideration of Rs.11 crs. by a separate Sale Deed dt.21.01.2011.
- The Permits are transferred in the name of Brima Sagar Maharashtra Distilleries Limited (BSMDL), the Purchaser, by a separate Agreement dt.29.11.2010 and the consideration therefor is shown at Rs.16.80 crs. This amount is included in the consideration of Rs.39 crs. as per the BTA.
- The consideration received on account of sale of Land and Building is not included in the consideration as per BTA but it is included in the break-up of consideration as per the Resolutions of the Board of Directors as under:

Land	6.35
Building	4.65
Plant & Machinary	11.65
Furniture & Fittings	0.25
Equipments	0.10
Vehicles	0.20
Goodwill	10.00
Manufactuiring Licenses	16.80
Total	50.00

- As per the Business Transfer Agreement (BTA), the Seller (TBMSSL) has agreed to sell and the Purchaser (BSMDL) has agreed to purchase the Business.
- Purchase Price is defined as payable in respect of the 'Business', excluding the price of Inventory.
 It means purchase price is for Assets (excluding Inventory), Employees, Liabilities and Liens.
- 'Business' is defined as "means Assets, Employees, Liabilities and Liens".
- 'Assets' are defined as -"mean all property, assets, benefits and rights of the Seller relating to the Business, (a) benefit of the Permits as set out at Schedule "1", (b) the plant and machinery as set out at Schedule "2", (c) the, furniture and fixtures, vehicles and equipment as set out at Schedule "3", (d) the intangibles including the Intellectual Property described at Schedule "4", (e) the benefit of all contracts relating to the Business listed at Schedule "5', (f) Inventory such as raw and packing materials, finished goods, stock in process, imported concentrates, molasses Rectified Spirits, Extra Neutral Alcohol, Malt Spirit, Grape Spirit, Cane juice Spirit, Maize Spirit as set out at Schedule "6" ("Inventory")."

Thus, we see that in the definition of 'Assets', there's a reference to the Schedule 2 for the study of which the aforesaid determination order dt.20.10.2014 has been remanded. As can also be seen, the Schedule 2 is about 'plant and machinery'. From the copy of the Schedule 2 as made available by the applicant, it is seen that year wise details are available. The name of the party from whom purchased is mentioned alongwith the details of purchases. There is no mention of the amount or price against any detail, except in a few cases. The relevant details as found in the Schedule 2 are reproduced in the Table below thus:

Schedule – 2

Date of Completion 20-03-2010

As mentioned above, the relevant details from the Schedule 2 as are relevant to the present proceedings have been reproduced above. The details of the items in terms of the name of the party from whom purchased, bill no. have not been reproduced. Further, bill amounts are not mentioned in the Schedule 2 except in items related to details of fees and that, too, in a very few cases.

At first sight, one can see that the Schedule enumerates the movable goods. As for erection and commissioning charges, they form a part of the purchase price or the cost at which goods were purchased by the applicant. The above details do not, in any way, suggest that the items enlisted therein are immovable property. They are movable property such as the various machinery and equipments. When we see the definition of 'assets' which refers to the Schedule 2, we find that the same was also linked to movable goods, tangible as well as intangible, thus -

"mean all property, assets, benefits and rights of the Seller relating to the Business, (a) benefit of the Permits as set out at Schedule "1", (b) the plant and machinery as set out at Schedule "2", (c) the, furniture and fixtures, vehicles and equipment as set out at Schedule "3", (d) the intangibles including the Intellectuai Property described at Schedule "4", (e) the benefit of all contracts relating to the Business listed at Schedule "5', (f) Inventory such as raw and packing materials, finished goods, stock in process, imported concentrates, molasses Rectified Spirits, Extra Neutral Alcohol, Malt Spirit, Grape Spirit, Cane juice Spirit, Maize Spirit as set out at Schedule "6" ("Inventory")."

The agreement for sale of immovable property was entered into separately in the form of the Sale Deed dt.21.01.2011. It is therefore that we find that the Business Transfer Agreement (BTA) dt.16.12.2016 entered into for a consideration of Rs.39 crs. was for sale of movable goods (tangible as well as intangible), the break-up of which was thus:

Plant & Machinery	Rs. 11,65,00,000/-		
Furniture & fittings	. Rs. 25,00,000/-		
Equipments	Rs. 10,00,000/-		
Vehicles	Rs. 20,00,000/-		
Goodwill	Rs. 10,00,00,000/-		
Manufacturing Licenses	Rs. 16.80,00,000/-		
Total	Rs. 39,00,00,000/-		

The entire consideration for the transaction was 50 crs. which comprised movable of Rs.39 crs. and immovable of Rs.11 crs. (Land and Building at 6.35 crs and 4.65 crs., respectively). The aggregate consideration was thus -

Land	6.35	IMMOVABLE	
Building	4.65		
Plant & Machinary	11.65	MOVABLE	
Furniture & Fittings	0.25		
Equipments	0.10		
Vehicles	0.20		
Goodwill	10.00		
Manufactuiring Licenses	16.80	200000000000000000000000000000000000000	
Total	50.00	TOTAL	

Copies of a few journal entries with regard to the sale of assets and other papers were given during the earlier proceedings and form a part of the record. Details of these could be seen thus –

Mumbal

4	Furniture, Fittings, Equipments and Laboratory Apparatus				
			11,65,00,000.00	14,51,56,192.62	(2,86,56,193)
	Capital work in progress	01.12.2010		2,71,15,493.62	(2.0/ 5/ 102)
	Boiler	01.12.2010		10,01,189.00	
	Bio Composting	01.12.2010		17,59,666.00	
	Potable Liquor	01.12.2010		1,24,99,616.00	
	Power Plant	01.12.2010		3,45,40,662,00	
3	Plant & Machinery Alcohol	01.12.2010		6,82,39,566.00	

It can be seen from the above that the Accounting System of the applicant recognized the Buildings in terms of the operations carried out therein such as Alcohol, Power Plant, Potable Liquor, Bio composting, Other Buildings, etc. Even the Plant & Machinery is identified in terms of the operations such as Alcohol, Power Plant, Potable Liquor, Bio composting, Boiler. Now we have seen above that the applicant has sold the Buildings and the Land and the Plant and Machinery by separate Deeds. What I intend to put across is that the immovable portion i.e the Land and the Building which housed the plant & machinery were sold separately. The applicant's treatment of the transaction itself negates any doubts as to the plant & machinery being immovable assets. sales Nevertheless I do not go by the treatment alone. I have reproduced the Schedule 2 above and it shows that the same is a listing of the movable machinery and equipments. The argument that the civil work carried out leads to the machinery being immovable property is not by any means an argument in correct appreciation of facts and laws. During hearing the applicant's attention was invited to the case law in Commissioner of Central Excise, Ahmedabad v. Solid and Correct Muministreering Works [(2010) 5 SCC 122] in which the Hon. Supreme Court had taken strenuous pains to expound and enlighten as to what constitutes immovable property. The Hon. Court had to deal with the argument, as in the present case before me, that the machinery become immovable as they are fixed to a foundation imbedded in earth Thus, the Hon. Supreme Court was faced with the question of what constitutes movable and immovable property. I would reproduce the relevant portion thereof thus -

[&]quot;18. It is not the case of the respondents that plants in question are per se immoveable property. What is argued is that they become immovable as they are permanently imbedded in earth in as much as they are fixed to a foundation imbedded in earth no matter only l = feet deep. That argument needs to be tested on the touch stone of the provisions referred to above. Section 3(26) of the General Clauses Act includes within the definition of the term "immovable property" things attached to the earth or permanently fastened to anything attached to the earth. The term "attached to the earth"; has not been defined in the General Clauses Act, 1897. Section 3 of the Transfer of Property Act, however, gives the following meaning to the expression "attached to the earth":

⁽a) rooted in the earth, as in the case of trees and shrubs;

⁽b) imbedded in the earth, as in the case of walls and buildings;

⁽c) attached to what is so imbedded for the permanent beneficial enjoyment of that to which it is attached." e:\desktopbackup_15.11.16\kadam \lm12\ddq\brihans-remand.docx 25

- 19. It is evident from the above that the expression "attached to the earth" has three distinct dimensions, viz. (a) rooted in the earth as in the case of trees and shrubs (b) imbedded in the earth as in the case of walls or buildings or (c) attached to what is imbedded for the permanent beneficial enjoyment of that to which it is attached. Attachment of the plant in question with the help of nuts and bolts to a foundation not more than I= feet deep intended to provide stability to the working of the plant and prevent vibration/wobble free operation does not qualify for being described as attached to the earth under any one of the three clauses extracted above. That is because attachment of the plant to the foundation is not comparable or synonymous to trees and shrubs rooted in earth. It is also not synonymous to imbedding in earth of the plant as in the case of walls and buildings, for the obvious reason that a building imbedded in the earth is permanent and cannot be detached without demolition. Imbedding of a wall in the earth is also in no way comparable to attachment of a plant to a foundation meant only to provide stability to the plant especially because the attachment is not permanent and what is attached can be easily detached from the foundation. So also the attachment of the plant to the foundation at which it rests does not fall in the third category, for an attachment to fall in that category it must be for permanent beneficial enjoyment of that to which the plant is attached.
- 20. It is nobody's case that the attachment of the plant to the foundation is meant for permanent beneficial enjoyment of either the foundation or the land in which the same is imbedded.
- 21. In English law the general rule is that what is annexed to the freehold becomes part of the realty under the maxim quidcquid plantatur solo, solo cedit. This maxim, however, has no application in India. Even so, the question whether a chattel is imbedded in the earth so as to become immovable property is decided on the same principles as those which determine what constitutes an annexation to the land in English law. The English law has evolved the twin tests of degree or mode of annexation and the object of annexation. In Wake V. Halt (1883) 8 App Cas 195 Lord Blackburn speaking for the Court of Appeal observed:

"The degree and nature of annexation is an important element for consideration; for where a chattel is so annexed that it cannot be removed without great damage to the land, it affords a strong ground for thinking that it was intended to be annexed in perpetuity to the land."

- 22. The English law attaches greater importance to the object of annexation which is determined by the circumstances of each case. One of the important considerations is founded on the interest in the land wherein the person who causes the annexation possesses articles that may be removed without structural damage and even articles merely resting on their own weight are fixtures only if they are attached with the intention of permanently improving the premises. The Indian law has developed on similar lines and the mode of annexation and object of annexation have been applied as relevant test in this country also. There are cases where machinery installed by monthly tenant was held to be moveable property as in cases where the lease itself contemplated the removal of the machinery by the tenant at the end of the tenancy. The mode of annexation has been similarly given considerable significance by the courts in this country in order to be treated as fixture. Attachment to the earth must be as defined in Section 3 of the Transfer of Property Act. For instance a hut is an immovable property, even if it is sold with the option to pull it down. A mortgage of the super structure of a house though expressed to be exclusive of the land beneath, creates an interest in immovable property, for its permanently attached to the ground on which it is built.
- 23. The courts in this country have applied the test whether the annexation is with the object of permanent beneficial enjoyment of the land or building. Machinery for metal-shaping and electro-plating which was attached by bolts to special concrete bases and could not be easily removed, was not treated to be a part of structure or the soil beneath it, as the attachment was not for more beneficial enjoyment of either the soil or concrete. Attachment in order to qualify the expression attached to the earth, must be for the beneficial attachment of that to which it is attached. Doors, windows and shutters of a house are attached to the house, which is imbedded in the earth. They are attached to the house which is imbedded in the earth for the beneficial enjoyment of the house. They have no separate existence from the house. Articles attached that do not form part of the house such as window blinds, and sashes, and ornamental articles such as glasses and tapestry fixed by tenant, are not affixtures.
 - 24. Applying the above tests to the case at hand, we have no difficulty in holding that the manufacture of the plants in question do not constitute annexation hence cannot be termed as immovable property for the following reasons:
 - (i) The plants in question are not per se immovable property.
 - (ii) Such plants cannot be said to be "attached to the earth" within the meaning of that expression as defined in Section 3 of the Transfer of Property Act.
 - (iii) The fixing of the plants to a foundation is meant only to give stability to the plant and keep its operation vibration free.
 - (iv) The setting up of the plant itself is not intended to be permanent at a given place. The plant can be moved and is indeed moved after the road construction or repair project for which it is set up is completed."

For the record, I would like to emphatically state herein that the aforesaid case law is referred to understand the principles and to determine these principles, the Hon. Court has certainly not referred to the facts of the case before it but to the relevant definitions and judicial history. Therefore, the argument that the case law would not apply is incorrect. Having said so, I

refer to the principles which fortify my observation, and the earlier Commissioner's, as well, that the impugned plant & machinery constitutes movable property –

- i. The expression "attached to the earth" has three distinct dimensions, viz.
 - (a) rooted in the earth as in the case of trees and shrubs
 - (b) imbedded in the earth as in the case of walls or buildings or
 - (c) attached to what is imbedded for the permanent beneficial enjoyment of that to which it is attached.
- ii. Attachment of the plant to the foundation is not comparable or synonymous to trees and shrubs rooted in earth.
- iii. Attachment of the plant to the foundation is also not synonymous to imbedding in earth of the plant as in the case of walls and buildings, for the obvious reason that a building imbedded in the earth is permanent and cannot be detached without demolition.
- iv. Imbedding of a wall in the earth is also in no way comparable to attachment of a plant to a foundation meant only to provide stability to the plant especially because the attachment is not permanent and what is attached can be easily detached from the foundation.
- v. The attachment of the plant to the foundation at which it rests does not fall in the third category, for an attachment to fall in that category it must be for permanent beneficial autionyment of that to which the plant is attached.

The seen the photographs and the Schedule 2, the items of which have been reproduced above. The civil work carried for the installation of machinery can in no way be said to mean that the machinery is attached to the foundation which is for permanent beneficial enjoyment. The details of the enlisted machines and equipments show that they constitute movable property and the applicant has also treated these machinery as movable by enacting separate agreements for movable and immovable property. From the total consideration for the transfer of business, the consideration on account of the movable plant and machinery is available. In view thereof, the ratio of the decisions of the Hon. MSTT in Johnson & Johnson Ltd., v. State of Maharashtra (Second Appeal No. 1340 of 2005, decided on June 16, 2012) and Nicholas Piramal India Ltd. v. State of Maharashtra (39 MTJ 325) would perfectly apply to the facts of the present case and thereby, the consideration received for the plant & machinery as found in Schedule 2 would be exigible to tax under the MVAT Act,2002. The observations of the Hon. MSTT in these cases could be seen thus -

M/s. Johnson & Johnson Ltd., Appellant V. The State Of Maharashtra (cited supra)

The facts were such that the agreement provided for purchase price as a lump sum consideration for sale of business undertaking as going concern for Rs. 27,78,10,000/-. Out of this, total consideration as per Deed of Assignment, the price for goodwill was shown separately at Rs.2,60,00,000/. This price was agreed upon by the buyer as well as the seller

though it was shown for the purpose of stamp duty. The Hon. MSTT held that – e:\desktopbackup_15.11.16\kadam \lm12\ddq\brihans-remand.docx 27

"This can be constituted as an independent agreement within main agreement. One can read two agreements within one agreement. So this is constituted as an independent agreement. Hence we conclude that this is a separate agreement within a main agreement. In case of M/s. T.P. Sokkalal Ramsait Factory Pvt. Ltd. v. Deputy Commissioner of Sales Tax (110 STC 419) lordships observed that "What is a sale of goods? Section 4(i) of the Sale of Goods Act defines it as a contract of sale of goods whereby the seller transfers or agrees to transfer the property in the goods to the buyer for a price. The essential elements of a sale are: (1) goods, (2) seller and the purchaser, (3) agreement between them for sale and purchase, (4) transfer of property in the goods from seller to buyer as a result of the agreement between them, and (5) the price being the consideration for the transfer of property under the agreement. In each case, the facts will have to be examined to see whether all these elements are present. If any one or more of them is absent, the conclusion is inevitable that the facts do not constitute a sale of goods."

12. We observed in this case on facts that there is a separate agreement within a main agreement for sale of goods at Rs. 2,60,00,000/- and it fulfills all the above mentioned criteria. Therefore, we have no hesitation to uphold the levy of tax of the assessing authority and confirmed in the first appeal."

The applicant had filed Reference Application against the aforesaid decision which was dismissed on dt.01.11.2012 (M/s. Johnson & Johnson Ltd. v. State of Maharashtra (Reference Application No. 79 of 2012). One of the grounds pleaded was that the nature of the contract would not be affected by the fact that the components of the various contract amounts or the prices were shown separately and therefore even if the goodwill is valued and shown separately in the deed of assignment, it makes no difference and the sale remains that of going concern. The Hon. MSTT was not convinced with the case laws cited by the applicant and observed that when the applicant themselves valued the goodwill and the same was shown in the deed of assignment, it was not correct for the applicant to plead that there was no sale of goodwill.

Sales in respect of the above case, it was observed, thus, in the in the earlier determination order-

"Thus, it can be seen that where the purchase price for the sale of a business undertaking as a going concern was fixed not as a lump sum consideration but a bifurcation thereof was available, then the same could be made taxable in so far as it related to the sale of goods taxable under the Sales Tax statutes."

Nicholas Piramal India Ltd. v. State of Maharashtra (cited supra)

The facts were that the appellant had entered into an agreement with an individual Mr. T. R. Choudhari (TRC), who was the sole proprietor of a business concern known as "M/s. Electro Optics and Controls" which had its factory at Rishikesh in Uttar Pradech and head office in Mumbai (Mulund). By this Agreement, which was entered into in Mumbai, the Appellant purchased from TRC certain "specified assets" i.e. Land and Building of the Rishikesh Factory, plant and machinery in the Rishikesh Factory, inventory of products, and IPR. This purchase was made for total consideration of Rs.220 lakhs which was split up in the Agreement in various components as follows:

Rishikesh land & Building	25
Plant & machinery	15
Non Compete	25
Inverters & IPR	155
Total	220

With regard to the above facts, the Hon. MSTT observed thus -

"......even if the Agreement is held to postulate transfer of whole of business as contended by Mrs. Rangnekar, it may not necessarily mean that it does not involve sales of moveables liable to tax under the Sales Tax Law. In other words, transfer of whole of business does not necessarily mean that it does not involve sales of moveables, taxable under the Sales Tax Law. If the Agreement for the transfer of whole of business is for lump sum consideration, it may not involve sales of moveables taxable under the Sales Tax law. But if the transfer of whole of business is for a consideration which is categorically agreed to be split up item-wise, then it may involve sales of moveables taxable under the Sales Tax Law. In that view of the matter, according to us, even if the transaction is held to be of transfer of whole of business as contended by Mrs. Rangnekar, it may be legally permissible to levy tax on the sales of moveables for the reason of the consideration having been split up item-wise.

it would be of no assistance to plead that this transfer would not constitute any sales/purchases of moveables liable to tax under the Sales Tax Law. As stated earlier, even a transfer of entire business may involve sales/purchases of moveables liable under the Sales Tax Law depending on the Terms of the Agreement. Transfer of entire business does not necessarily imply that it does not involve sales/purchases of moveables. In that view of the matter, a question may arise on the basis of the aforesaid case of M/s. Sunderdas Harjiwan (supra) as to whether the Tribunal in the present case was legally justified in holding that there was no transfer of entire business. But that is really not the decision which has affected the Appellant's tax liability. The real decision which has affected the tax liability is to hold that the impugned transaction involves sales/purchases of moveables liable to tax under the Sales Tax Law, and no question in that regard arises on the basis of the aforesaid case of M/s. Sunderdas Harjiwan (supra).

Same is the position so far as the other judicial authorities are concerned viz. Allahabad High Court case of M/s. Shri Ram Sahai (supra) and Kerala High Court case of M/s. Zacharia (supra). These cases merely show in which circumstances the transfer can be said to be of entire business, but they do not show as an uncontroverted position that the transfer of entire business would always and necessarily not involve sales/purchases of moveables liable to tax under the Sales Tax Law. No doubt, in the case of M/s. Zacharia (supra), the receipts on account of transfer of entire business were held as exempt from tax, but that was because of the specific provisions in the Kerala General Sales Tax Act to allow deduction from the taxable turnover in respect of "all amounts realised by a dealer by the sale of his business as a whole". The High Court held on the particular facts that there was transfer of the entire business and accordingly, the said deduction was allowed thereby deleting the tax levied by the Revenue on the amount received by the Assessee by virtue of the transfer. Such a deduction as obtaining in Kerala General Sales Tax law is not there in the Bombay Act, and hence the said judgment would not be helpful for referring any question."

In respect of the above case, it was observed, thus, in the in the earlier determination order-

"The above case was decided on dt. 29.11.2008. The Hon. MSTT has very clearly held that if the terms of agreement provide for a item-wise split-up of the consideration then, despite the fact that the transaction represents a transfer of running business, there is no bar to levy sales tax on the consideration received in respect of the moveable goods involved therein. The Hon. MSTT has discussed the legality of the ratios tild down by the Hon. Courts in the matter of sale of running business and distinguished the same with regard to facts such that there was no lumpsum consideration but a bifurcation of the same in terms of price for movables was available. The same ratio, as comes out from this judgment dt.29.11.2008, has been Mendorsed of the Hon. MSTT in M/s. Johnson & Johnson Ltd., Appellant v. The State of Maharashtra (cited supra) referred to hereinearlier. I would like to mention here that, in cases where the situation was not so or where there was a lumpsum consideration, the Hon. MSTT has held that the sale of running business was not taxable. In the case of M/s. Sealants and Gasket Industries v. State of Maharashtra (2006-(034)-MTJ -0122), the Hon. MSTT remarked that the agreement did not show any intention to effect a separate sale of movables for certain specific consideration. Thus, the ratio that comes out the Hon. MSTT decisions is to treat sales of movables taxable under the Sales Tax Law in case of transfer of whole of business for a consideration which is categorically agreed to be split up item-wise. Further, the decisions of the Hon. Courts are on the issue of lumpsum consideration and in respect of provisions not pari materia with the ones under the Maharashtra Sales Tax statutes."

It was in view of the aforesaid decisions that my predecessor in the earlier determination order had held that the consideration on account of movable goods, tangible as well as intangible, e.g., plant and machinery was exigible to tax as the consideration therefor was distinctly identifiable out of the total consideration for the transfer of business. In view thereof, I find that the consideration on account of plant & machinery as found in Schedule 2 is on account of movable goods and is, certainly, not for immovable property.

With regard to reliance on the aforesaid two decisions of the Hon. MSTT, the applicant has placed reliance on a decision of the Hon. MSTT in M/s. Lark Engineering (SA No. 40 of 1997 dt.07.04.2000). With regard to the same, I have to observe that the said case law of M/s. Lark Engineering (cited supra) is not on the direct issue that is faced before me. In M/s. Lark Engineering (cited supra), as relied on by the applicant, the bifurcation of land and machinery was not available but a collective value was available. The present circumstances are not so. We have seen above that the decisions of the Hon. MSTT as relied on by me as well as by my predecessor, are on the very issue that is being dealt with in the present applicant's case. Therefore, my treatment to the bifurcation as available is supported by the decisions of the very Hon. MSTT.

04. In view of the deliberations held hereinabove, I determine thus -

ORDER

(under section 56(1) (e) of the Maharashtra Value Added Tax Act, 2002)

No.DDQ-11/2013/Adm-6/ 23/Remand-2016/B-1

Mumbai, dt. 22'03'2017

For reasons as discussed in the body of the order, it is determined that -

- Johnson Ltd., v. State of Maharashtra (Second Appeal No. 1340 of 2005, decided on June 16, 2012) and Nicholas Piramal India Ltd. v. State of Maharashtra (39 MTJ 325), the determination order No.DDQ-11/2013/Adm-6/23/B-4 Mumbai, dt.20.10.2014 has rightly determined that the split-up of the consideration as available from the Agreements would render the transaction to the extent of the consideration received on account of the movable assets to be a 'sale' of goods for the purposes of the Maharashtra Value Added Tax Act, 2002.
- 2. Schedule 2 enlisting plant and machinery represents movable goods.
- 3. Tax would be leviable on the consideration on account of plant and machinery.

(RAJIV JALOTA)

COMMISSIONER OF SALES TAX, MAHARASHTRA STATE, MUMBAI
